DETAILED ACTION

1. Applicant's amendment filed 1/23/06 has been entered and made of record.
2. Drawings filed 1/23/06 are approved by the examiner.
3. This application is in condition for allowance except for the following formal matters:

The abstract filed 1/23/06 is objected because it contains more than 150 words and is not on a separated sheet. Thus, the new abstract in narrative form and generally limited to a **single paragraph on a separate sheet within the range of 50 to 150 words** is required in response to this office action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

4. Claims 1-4 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the closest prior art [USPN \$,710,876 to Cline et al.] does not teach or suggest a method of analyzing an object data set which comprises points in a multi-dimensional space and in which a tubular structure occurs, said method comprising the following steps: a) choosing a starting position in or near the tubular structure; b) deriving a cutting plane through the tubular structure at the starting position, c) determining a number of points forming part of the surface of the tubular structure in the vicinity of the starting position, and d) calculating a gradient to the surface for each of said points; e) determining for each point a vector from the center of the tubular structure to said point; f) determining the angle between

Art Unit: 2627

said vector and the gradient at said point; g) adding said point to a selection of points if said angle is equal to or smaller than a predetermined ceiling value; h) using said selection of points to calculate an orientation for the cutting plane such that the direction thereof is as parallel as possible to the longitudinal axis of the tubular structure at the starting position, and i) repeating the steps a) through h) for a new starting position along the tubular structure if necessary.

Claims 2-4 depend from claim 1 and thus are also allowable for the same reasons as above.
